

EMERGENCY CARE · GP PRACTICES

Emergency drugs & equipment checklist

A monthly check sheet for the emergency trolley or grab bag. Agree the contents with your clinical leads, using your risk assessment and current CQC and Resuscitation Council UK guidance.

Location of kit _____

Kit owner _____

Month _____

Seal number _____

Agree your list clinically

This list shows the equipment and medicine *categories* that practices commonly hold. Your clinical leads should decide the exact medicines and doses for your practice, record that decision in a risk assessment, and review it regularly.

Equipment

Item	Qty	Expiry / check	Checked	Initials
Automated external defibrillator (AED), charged				
Adult and child defibrillator pads				
Oxygen cylinder, with enough in it and in date				
Oxygen masks (adult and child) and tubing				
Bag valve mask (adult and child)				
Oropharyngeal airways in a range of sizes				
Portable suction				
Pulse oximeter				
Blood glucose meter and strips				
Gloves, apron, scissors and razor				
Sharps bin				
Blood pressure monitor				

— Medicines (as agreed by your practice)

Medicine	Strength / form	Qty	Expiry	Initials

Top tip

Check the kit on the same day each month, and after every use. Record every check, even when nothing needed replacing. CQC will want to see the log.

— Monthly sign-off

Date	Checked by	Items replaced	Seal number	Signature

Stock up in one order

Order by 4pm for next-day delivery. One account, one invoice.
